

Lead AI Contractor Engagement Model

Independent Contractor | Project-Based AI Delivery

Built for the Enterprise. Designed for the Long Term.

Salyant helps UK enterprises design, govern, and scale AI workflow automation and complex system integrations without technical debt. We are not a 'ticket factory.' We solve complex operational bottlenecks for regulated sectors like Financial Services and Healthcare.

UK Registered & Governed

Fully incorporated entity (London) operating under UK law with strict GDPR alignment.

ISO 27001 Alignment

Security practices are not optional; they are the product.

Global Delivery

Governed in the UK, operating a distributed, asynchronous delivery model.

The Lead AI Contractor Role

Technical Ownership Without the Bureaucracy.

- **Context:** Designed for senior engineers who value autonomy over 'face time'.
- **Senior-Only Execution:** No hand-holding junior staff. You are the architect and the builder.
- **End-to-End Ownership:** You own the specific module from design to deployment.
- **Direct Impact:** Work on production automation and real client systems, not just demos.

Philosophy: You determine the 'how'.
We define the 'what' and the 'when'.

A True Independent Partnership

Non-Exclusive. Project-Based. Autonomous.

Independent Status

You operate as a separate business entity.
No employment relationship or benefits.
(Reference Section 1.1 of the Agreement)

No Mutuality of Obligation

Salyant is not obliged to offer work;
you are not obliged to accept it.
(Reference Section 1.2)

Non-Exclusivity

Free to serve other clients provided
confidentiality is maintained.

Allocation Model

First-Come, First-Served access to the
contractor pool. Acceptance creates a binding
delivery obligation for that specific scope only.

Production-Grade AI Engineering

Moving beyond 'happy path' demos to hardened enterprise systems.

AI Systems

- LLM integrations (OpenAI, Anthropic), RAG systems, and agentic workflows.

Automation

- Advanced orchestration using n8n, event-driven pipelines, and cross-system logic.

Integration

- REST/GraphQL APIs, authentication handling, and secure credential management.

Hardening

- Error handling, fallback logic, and observability.

Operational Expectations & Standards

A summary of key service level agreements and protocols.

Responsiveness (Critical)

A 48-hour response window is mandatory during active delivery. Silence >48 hours is considered 'Module Abandonment' and a material breach. (Reference Section 4.3)

Code of Conduct

Professional interaction within the contractor pool. No attempting to 'snatch' accepted work or undermine peers.

Delivery Definition

'Ownership' means solving the problem, testing for edge cases, and ensuring client readiness—not just closing a ticket.

Tools

All client communication must occur solely through Salyant-approved channels. (Reference Section 2.3)

Clear, Execution-Based Commercials

Structure	Agreed per module (Fixed Fee, Milestone, or Hourly).
Currency	All compensation denominated in GBP (£).
Payment Trigger	Payment is released upon completion of scope, Salyant acceptance, and receipt of client funds. (Reference Section 3.1)
Clarification	No entitlement to holiday pay, sick pay, or pension contributions. You handle your own taxes/National Insurance.

Revenue Participation Models

Shared Success Model (Optional & Project-Specific)

7%

Execution

(Up to 7% Net Revenue)

For Lead Engineers delivering sole implementation on complex projects.

3%

Support & Audit

(Up to 3% Net Revenue)

For material technical input during SIGA or critical delivery escalations.

9%

Origination

(Up to 9% Net Revenue)

For introducing new clients that result in a paid engagement.

Calculated on Net Revenue (ex-VAT/costs). Applies only where explicitly recorded in the specific project agreement.

Intellectual Property & Confidentiality

Immediate Vesting

All work product (code, workflows, prompts, documentation) vests exclusively in Salyant Ltd immediately upon creation.

(Reference Section 5.1)

Absolute Assignment

This transfer is not conditional on payment. Payment disputes are treated as separate debt claims.

Confidentiality

Strict protection of client identity, pricing models, and internal system architecture.

Waiver

Irrevocable waiver of moral rights.

Security as a Core Competency

Contractor acts as a Data Processor under UK GDPR.

No Local Storage

Client data must never be stored on personal devices.

Breach Reporting

12-hour notification window for any suspected data breach.
(Reference Section 8.4)

Encryption

VPN and secure authentication are mandatory for all access.

Location

Data processing must occur within the UK unless specific international access is authorised.

We work with regulated data. Security is not an afterthought; it is part of the job description.

The Governing Agreement

INDEPENDENT CONTRACTOR AGREEMENT

BETWEEN:
SALYAK LTD...
when SALYAK LTD, a related corporation to the independent contractor and its company document.

AND:
[CONTRACTOR NAME]...
and [CONTRACTOR NAME]... conditional name or statement header contractor document.

This is intended to be used in the main present part to amend to the independent agreement.

CONTRIBUTION:
The Independent Contractor Agreement - Independent Contractor Agreement of the independent contractor requires valid Government ID (Passport) and Proof of Address. (Reference Annexure A)

The contractor is to be used to the set of documents and the document is to be used to the independent agreement.

NOTES:

1. **Format:** Electronic execution via BoldSign or statement header required for payment.
2. **Identity Verification:** Requires valid Government ID (Passport) and Proof of Address. (Reference Annexure A) Signature of the contractor is required for the independent agreement, or the contractor is to be used to the independent agreement.
3. **Bank Details:** Verification via cancelled cheque or statement header required for payment. The contractor is to be used to the independent agreement.
4. **Advice:** Contractors are encouraged to seek independent legal/tax advice. For additional advice to seek independent legal/tax advice.

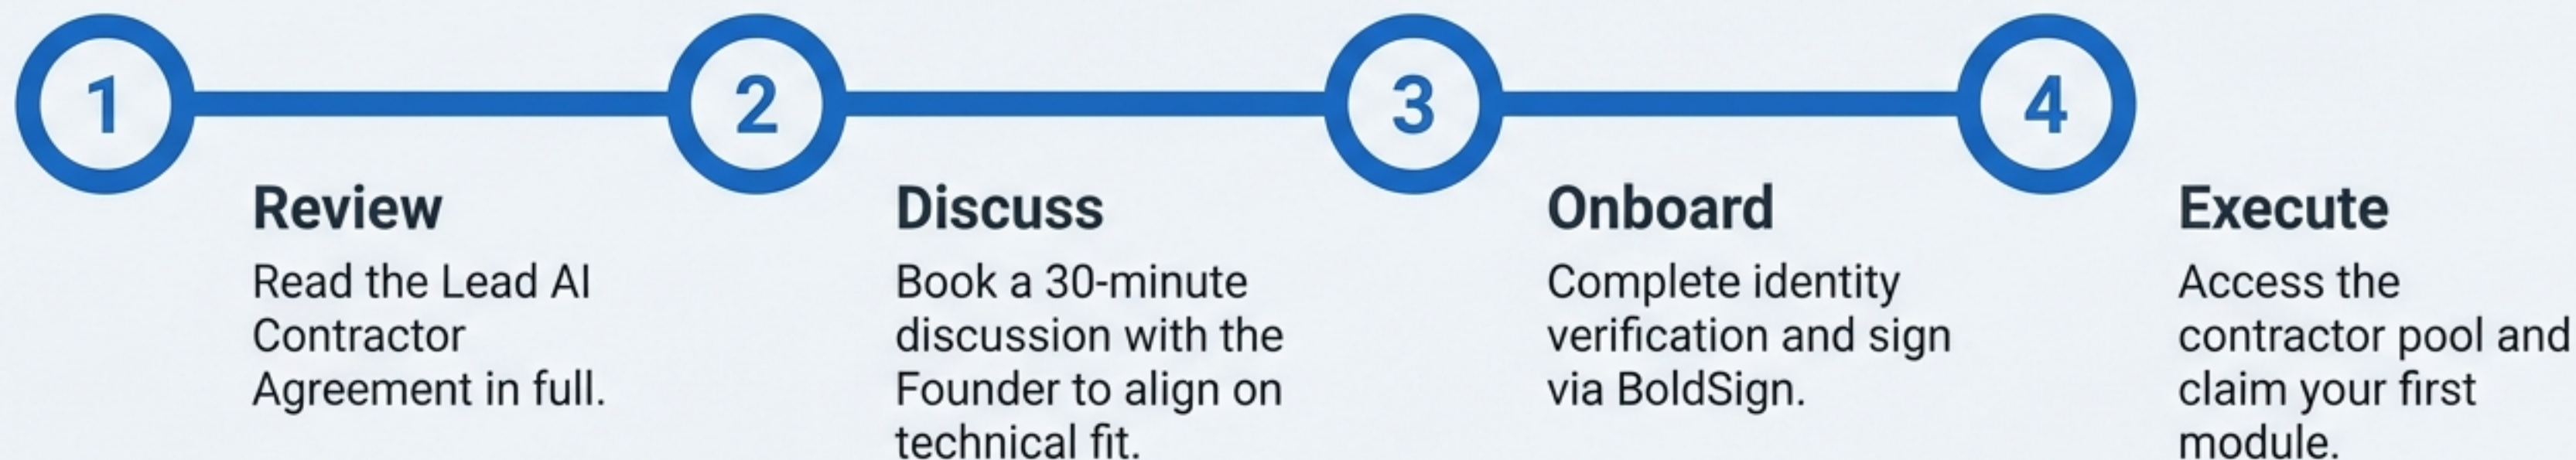

Execution Process

- **Format:** Electronic execution via BoldSign (eIDAS compliant).
- **Identity Verification:** Requires valid Government ID (Passport) and Proof of Address. (Reference Annexure A)
- **Bank Details:** Verification via cancelled cheque or statement header required for payment.
- **Advice:** Contractors are encouraged to seek independent legal/tax advice.

Note: This presentation is a summary; the 'Independent Contractor Agreement' is the binding document.
